

TITLE

**PROTECTIVE HELMET AND ITS MEANS FOR CONNECTING AN
ACCESSORY**

APPLICANT

GALLET SA

ABSTRACT OF THE DISCLOSURE

Protective helmet (1) including a main outer shell with a generally vertical plane of symmetry (P) on which an accessory, such as a clear or tinted visor or a support structure (8) for optronic equipment such as a night-vision device (9), can be fixed, characterized in that it includes connecting and locking means enabling the user to fix one or the other of the accessories to said helmet.
